Compliance Checking

Inspection list	Information required	Comments/Action
Visual & Odorous Emissions monitoring <i>visible dust, odour and droplet, mist, fumes & smoke emissions witnessed</i>	Electronic daily monitoring records with time, date and result for weeks 18/05/2020 and 18/01/2021	Satisfactory
Logbooks and Records <i>Particulate matter/local exhausts ventilation, controls and maintenance.</i>	Internal checks and maintenance carried out daily and monthly. Dust plants and silo system serviced internally due to COVID 19 restrictions.	Satisfactory
Silo pressure relief valves	Weekly check clean and reseal carried out and recorded. Disassembled and deep clean carried out every 6 months and recorded.	Satisfactory

Particulate matter <50mg	Extractive Monitoring Carried out on 04/02/2021 reported emissions concentration of 2.2mg/m³	Satisfactory
Gas oil Sulphur content	Kerosene – Prema 35 Certificate of Quality Sulphur content 0.05%	Satisfactory
Staff training and records	No new employees during the recording period and no updated training carried out due to COVID 19.	There is evidence of improved supervision of staff to improve the control of dust/sand emissions. Any written instruction can be added to staff training records and be made available to the regulator on demand.
Records of breakdowns, spillages or other incidents leading to abnormal emissions	Sand emission reported beyond the boundary due to small holes in filter bags. No complaints to Harlow Council received during the 2020/21.	Satisfactory.
External Inspection Findings	Regular drive by carried out no dust/sand emission witnessed and water suppression in place to control yard dust. The road way regularly cleaned by a road sweeping company.	Satisfactory.
