Schedule of Minor Modifications

(Note: Modifications to the Policies Map are at the end of this Schedule)

Policy/Para/Page	Representation	Changes to text – deletion in strikethrough – addition in red (Dots denote where the existing paragraph continues	Reason for change
		before/after the text)	
Chapters 1 and 2. Introdu	iction and Spatial Context		
Para 2.33 Page 16	Essex County Council	There is also a need to increase the frequency of the bus services to the industrial estates; to provide more opportunities to travel sustainably within and in and out of Harlow-and not just within; to increase the provision of Sunday services; and to improve journey times for buses-by decreasing congestion on Harlow's roads.	To ensure travel is sustainable and to consider the fact that there are other measures to improve bus journey times and not just the reduction in congestion
Para 2.34 Page16	Essex County Council	Sustainable transport matters (including walking, cycling and public transport) and reducing the need to travel are, therefore, important for the successful future growth of Harlow.	To recognise that reducing the need to travel is also important to sustainability
Para 2.35 Page 16-17	Herts County Council	Green Infrastructure is multi-functional natural and man-made urban and rural green space, including parks, playing fields, woodlands, allotments, and wildlife corridors, rivers, canals and other water bodies	To clarify and strengthen Green Infrastructure definition
Para 2.44 Page 18	Essex County Council	Residential growth, located, managed and phased appropriately, will help to provide the investment needed to deliver infrastructure requirements including improvements to the walking and cycling network and public transport, the local and strategic road network and social infrastructure such as education and health, including the future requirements of the Princess Alexandra Hospital.	To recognise that location of development and sustainable transport modes are important
Para 2.45 Page 18	N/A	Significant increase change is required in the population of Harlow is required in order to deliver the enhancements needed to ensure Harlow is a sustainable town for residents, businesses and visitors.	To clarify that an increase in population is what is needed to resolve issues and challenges in the town.
Chapter 3. Spatial Vision	and Local Plan Objectives		
Vision, final para Page 21	Natural England	New development will minimise the use of global resources, support the development of good waste management, and mitigate and adapt to the effects of climate change, and ensure	To be more NPPF compliant

		a net gain in biodiversity is delivered	
Fig. 3.3 (Local Plan Strategic Objectives) Page 22	Essex County Council	13. Reduce the need to travel by vehicle, and ensure new development is sustainably located and/or accessible by sustainable and innovative modes of transport	To highlight future innovation in transport
Fig. 3.3 (Local Plan Strategic Objectives) Page 22	N/A	14. Improve transport links, particularly for sustainable modes of transport, to community all facilities.	To clarify the importance of improving links to all facilities including access to jobs
Chapter 4. Spatial Develo	opment Strategy		
Para 4.5 Page 28 Natural England		New development will incorporate sufficient open space and Green Infrastructure, protect and integrate existing landscape assets, and enhance, retain and protect biodiverse habitats to ensure a net gain in biodiversity is delivered	To be more NPPF compliant
Para 4.20 Page 31	M. Harris (Deanery of Harlow)	This includes leisure and sporting facilities, playing pitches, playgrounds, allotments, and community halls and places of worship which will help reduce deprivation levels and promote healthy and active lifestyles.	To add reference to religious uses
Para 4.25 Page 31	Essex County Council	Improvements will be made to the local highway network, and to the footway and cycleway networks and public transport to improve connections within Harlow and to areas outside the district	To add reference to improvements to cycle and footway network
Fig. 4.1 (Key Diagram – Legend) Page 33	Andrew Martin Planning (for Miller Homes)	Indicative New allotment	To clarify that the location of the new allotment provision on the Strategic Housing Site East of Harlow is currently indicative and not definite
Fig. 4.1 (Key Diagram) Page 33	N/A	Modify the Indicative Sustainable Transport Corridor route (SIR1-1 and SIR1-2 on key). Further details of route to be provided.	To update the route to ensure it reflects the revised indicative route
Chapter 5. Development	and Delivery of Garden Cor	mmunities in Harlow and Gilston Garden Town	
Fig. 5.1 (Components of the Harlow and Gilston Garden Town – Legend) Page 43	N/A	**New Garden Communities, and housing sites allocated in Harlow, to be delivered in accordance with the Harlow and Gilston Garden Town Spatial Vision and Design Charter.	To clarify
Para 5.27 Page 44 (HGT1 Implementation)	Essex County Council	To clarify in regards to the education position for the entire East of Harlow site in the Garden Town not just Harlow	

Chapter 6. Promoting Sus	stainable Development		
Policy SD1 Page 49	Andrew Martin Planning (for Miller Homes)	Where there are no policies specifically relevant to the proposed development or the relevant policies are out-of-date, it will normally be supported, unless material considerations indicate otherwise and/or either of the following apply:	To be more NPPF compliant
Chapter 7. Housing Strate	egy and Growth Locations		
No changes			
Chapter 8. Economic Dev	elopment and Prosperity St	trategy	
No changes			
Chapter 9. Retail Ambition	ns and Town Centre Redev	elopment	
No changes			
Chapter 10. Linking Deve	lopment Sites to the Wider	Environment	
Para 10.11 Page 82 (WE1 Implementation)	Herts County Council	Green Infrastructure also includes rivers, canals and other water bodies found in green spaces, as well as and non-accessible green spaces which provide visual amenity	To clarify and strengthen Green Infrastructure definition
Para 10.12 Page 82 (WE1 Implementation)	Herts County Council	On a strategic scale, tThe Green Infrastructure network in Harlow includes the Green Belt, Green Wedges, Green Fingers,—and Other Open Spaces and the River Stort. On a smaller scale, it also includes trees, hedgerows, ponds, streams and landscaping in developments, such as green roofs or green walls	To clarify and strengthen Green Infrastructure definition
Fig. 10.1 (Land use types in Harlow) Page 83 (WE1 Implementation)	Herts County Council	Add notation that water uses are included in Green Belt, Green Wedge, Green Finger and Other Open Spaces.	To clarify
Para 10.15 Page 83 (WE1 Implementation)	Environment Agency	The Council will work with adjoining Councils and other appropriate bodies, through the Duty to Co-operate and the Harlow and Gilston Garden Town, to bring forward the 'Stort Riverpark', as well as future Green Infrastructure projects to maintain and improve footpaths, cycleways and bridleways and wildlife corridors across the district. The actions and measures contained in the Water Framework Directive will be used to provide opportunities for the Stort Riverpark.	To cross-reference policy with WFD
Policy WE2 Page 84	Environment Agency	The roles of the Green Wedges are to:	To ensure water bodies are

		 provide physical, visual and audial separation between neighbourhoods and between residential and industrial areas; provide Green Infrastructure, including open spaces for sport, recreation and quiet contemplation; wildlife corridors; footpaths, cycleways and bridleways; and rivers, canals, ponds, lakes and other water bodies; Green Fingers are generally smaller and thinner than the Green Wedges. The roles of the Green Fingers are to: provide open links between Green Wedges and/or other areas of green space; provide Green Infrastructure, including wildlife corridors; footpaths, cycleways and bridleways; and rivers, canals, ponds, lakes and other water bodies; 	referenced in the roles of the GWs and GFs
Policy WE3 Page 86	Natural England	All biodiversity and geodiversity assets in the district will be preserved and enhanced, to ensure a net gain in biodiversity	To be more NPPF compliant
Para 10.26, page 86	Quod (for Places for People)	TheAll biodiversity and geodiversity assets in Harlow are protected from inappropriate development.	To clarify protection of biodiversity and geodiversity assets
New para after existing para 10.26, page 86 (WE3 Implementation)	Quod (for Places for People)	Designated biodiversity and geodiversity assets are allocated on the Policies Map. The order of asset type follows the hierarchy in this policy (i.e. Sites of Special Scientific Interest are the highest order asset type). Non-designated assets of biodiversity and geodiversity importance, which extend the geodiversity and network of biodiversity and open spaces across the district, are identified in Evidence Base studies.	To clarify what designated and non- designated biodiversity and geodiversity assets are
Policy WE4 Page 87	N/A	Locally listed buildings are known as non-designated heritage assets	Not required – now explained more suitably elsewhere
Policy WE4 Page 87	Historic England	Registered Historic Pparks and Ggardens The Conservation Areas, Scheduled Monuments and Registered hHistoric pParks and gGardens are identified on the Policies Map.	To amend terminology
Chapter 11. Strategic Infr	astructure Requirements		
Para 11.17 Page 93 (SIR1 Justification)	West Essex Clinical Commissioning Group	The Council and Harlow Health Centres Trust are working together to expand health facilities for existing population growth and will work with the Clinical Commissioning Groups (West and East Essex and North Hertfordshire) and NHS	To clarify the important contributors to the provision of healthcare in Harlow and to identify the potential for increasing capacity within existing

		England to deliver new health facilities as part of planned growth. New healthcare facilities will be delivered where necessary, as part of new settlements ideally located in accessible locations, situated in a local centre with a range of other community facilities. Increasing capacity within current infrastructure will also be explored.	
Para 11.30 Page 94 (SIR1 Implementation)	Thames Water	It is anticipated that solutions to improving the network will be jointly funded by the utility providers and developers. When there is a capacity constraint and improvements in off-site infrastructure are not programmed, planning permission will only be granted where the appropriate infrastructure improvements to the satisfaction of the relevant water and sewerage undertaker will be completed prior to occupation of the development.	To ensure that off-site infrastructure is completed and appropriately phased with new development coming forward.
Para 11.33 Page 95 (SIR1 Implementation)	Essex County Council	Specific infrastructure items that are required to deliver growth locations and development sites will mostly be funded by Section 106 Agreements between the Council, County Council and the developer	To refer to the County Council when negotiating on S106 agreements with developers
New paragraph after existing para 11.34, page 96 (SIR1 Implementation)	Herts County Council	Household Waste Facilities The Council will work together with Essex County Council to consider and deliver greater capacity, where appropriate, for the local management of household waste which serves Harlow. Collaboration will be required with Hertfordshire County Council in respect of waste needs for the wider Garden Town area. Any facilities should be of a sufficient size and capacity that meets the needs of this growth and situated within an easily accessible location within the catchment areas of the new Garden Town communities.	To identify the potential needs for increasing the capacity of household waste facilities. This has arisen since the production of the Harlow Infrastructure Delivery Plan
Policy SIR2 Page 96	Essex County Council	5. The southern terminus of the Sustainable Transport Corridor where it first enters Harlow from development sites in Epping 6. Cambridge Road where it enters Harlow from Hertfordshire to the east of the District 6. 7. Vehicular and pedestrian access points to the north of the Town Centre	To recognise Cambridge Road as an important key destination for vehicles, pedestrians and cyclists within close proximity of Harlow Mill Station and as a key entrance point from Hertfordshire including Bishop's Stortford and Sawbridgeworth. Also clarify Eastern Crossing as being the Second Stort Crossing to be

			delivered					
Chapter 12. Background	to Development Manageme	ent in Harlow						
No changes								
Chapter 13. Placeshapin	9							
Policy PL1 Page 103	Essex County Council	(a) it is supported by a design rationale based on an understanding and analysis of local context and character, taking into consideration the Adopted Harlow Design Guide Supplementary Planning Document (SPD), the Harlow and Gilston Garden Town Spatial Vision and Design Charter, the Essex Design Guide and relevant national guidance;	To add reference to Essex Design Guide					
Para 13.23 Page 107 (PL4 Implementation)	Canal & River Trust	Small-scale development can include householder applications, school or sports related development, recreation and community uses, waterway uses and facilities/services related to an existing use.	To include waterway uses and facilities related to existing use					
Para 13.42 Page 111 (PL7 Implementation)	Herts County Council	Green Infrastructure is multi-functional natural and man-made urban and rural green space, including parks, playing fields, woodlands, allotments and wildlife corridors, rivers, canals and other water bodies. At a smaller-scale, it also includes measures to assist climate change mitigation, such as green roofs, and green walls, rain gardens and ponds.	To clarify and strengthen Green Infrastructure definition					
Para 13.44 Page 112 (PL7 Implementation)	Natural England	The Council may require a Management Plan to be submitted, which demonstrates how the future maintenance of the Green Infrastructure and landscaping would be managed, in order to protect its quality and functionality in the long-term-, including, where appropriate, the protection and recovery of priority habitats and species.	To be more NPPF compliant and ensure protection and recovery of priority habitats and species					
Policy PL8 Page 112	Natural England	Development should contribute to and enhance biodiversity or geodiversity assets, to ensure a net gain in biodiversity	To be more NPPF compliant					
Para 13.45 Page 112 (PL8 Justification)	N/A	As a planned New Town, Harlow benefits from networks of open spaces which contribute to the biodiversity of the district, conserve habitats of local significance and enable the appreciation of wildlife provide opportunities for people to enjoy nature.	Clarify opportunities for people arising from these assets					
Para 13.46 Page 112 (PL8 Justification)	Essex County Council	Helping to protect and enhance biodiversity is one of the fundamental aims of national policies and guidance, to halt the	To be more NPPF compliant					

	I		1
		everall decline in biodiversity to achieve a net gain in biodiversity	
Para 13.47 Page 112 (PL8 Implementation)	Essex County Council	In Harlow, the highest order asset type is Sites of Special Scientific Interest, followed by locally designated sites (Local Wildlife Sites and Local Nature Reserves), ancient woodland, and aged or veteran trees found outside ancient woodland	To add information
Para 13.48 Page 112 (PL8 Implementation)	Essex County Council	The Council will seek to protect and enhance non-designated assets of biodiversity and geodiversity importance, identified in Evidence Base studies, to extend the geodiversity and the network of biodiversity and open spaces across the district. If the richness of biodiversity evident at a non-designated asset increases sufficiently, it may become formally declared as a designated asset, such as a Local Wildlife Site or Local Nature Reserve. Information of any such declarations would be made available on the Council's website.	To add information on potential future declaration of assets
Para 13.49 Page 113 (PL8 Implementation)	Environment Agency	The Council may require assessments of biodiversity and geodiversity assets to be submitted, which identify the impacts of development and any necessary mitigation and/or compensatory measures, and consider the presence of invasive, non-native species and their management, including biosecurity measures and the eradication of invasive species. To ensure compliance with national biodiversity policy and legislation, applicants are advised to refer to the Essex Biodiversity Validation Checklist (or its successor), available on the Essex County Council website.	To ensure eradication of invasive species; and add advice that ensures developers check the Essex Biodiversity Validation Checklist
Para 13.55 Page 114 (PL9 Implementation)	Environment Agency	The Council may will require a Preliminary Risk Assessment assessments of any pollution and/or contamination of land considered to be contaminated to be undertaken and submitted, which identify any existing pollution and/or contamination, and the impacts of the development and any necessary mitigation and/or compensatory measures The Council may also impose conditions to control and manage pollution and contamination levels. Further investigations, assessments, long-term maintenance regimes and validation reports may also be required if land is contaminated.	To require all contaminated land to be subject to Preliminary Risk Assessment
New para after existing para 13.55, page 114	Environment Agency	Where contaminated sites have the potential to mobilise contaminants, or where there is a high-risk development	To further protect groundwater

(PL9 Implementation)		proposal within a vulnerable ground water area, mitigation	
Policy PL10	Essex County Council	measures must ensure the risks to groundwater are minimised. Re-order as follows:	To structure policy more
Page 114-115		2. 1. Water Management	appropriately
		3. 2. Flooding	
		4. 3. Sustainable Drainage Systems (SuDS)	
		1. 4. Water Quality	
Policy PL10	Environment Agency	44. Water Quality	To ensure water quality improvement
Page 114-115		Development must not adversely affect cause deterioration to	and increased protection for
		water quality, including quality of waterways and other bodies	biodiversity
		of water, identified Source Protection Zones (SPZ), Aquifers and all other groundwater. Development must aim to improve	
		such water quality.	
		Such water quality.	
		New development adjacent to water courses should seek to	
		include restoration and deculverting. The culverting of water	
		courses should be avoided. Where the applicant can	
		demonstrate that deculverting or other river enhancements are	
		unfeasible, a financial contribution will be sought to restore	
		another section of the same watercourse.	
		New development adjacent to designated main rivers must	
		provide and maintain an undeveloped buffer zone, of at least	
		eight metres, to the watercourse. Such development must also	
		include a long-term scheme to protect and enhance the	
D. II. DI 40	+=	conservation value of the watercourse.	
Policy PL10 Page 114-115	Environment Agency	32(a) it must not increase the risk of flooding elsewhere and must aim to reduce flood risk overall;	To ensure reduction of flood risk
Policy PL10	Essex County Council	32 (c) flood finished floor levels of development in Flood Zones	To correct terminology
Page 114-115		2 and 3 should be situated above the 1% (1 in 100 years) plus	
		climate change predicted maximum water level, plus a	
		minimum watertight depth finished floor level of 300mm above	
D. II. DI 10		the normal predicted water level;	<u> </u>
Policy PL10	Essex County Council	32 (g) flood flow routes should be preserved configured to	To correct terminology
Page 114-115	Faces County County	enable surface water to drain;	To place the state of the state
Policy PL10	Essex County Council	32 (h) where necessary, planning permission will be conditional	To clarify what planning permission
Page 114-115		upon flood protection and/or runoff control measures being	would be conditional upon
		operative before other works. the submission and approval of a	

		drainage management strategy that addresses all forms of flood risk.	
Policy PL10 New para after 32 (h) [i.e. at end of Flooding section] Page 114-115	Essex County Council	Development within identified Critical Drainage Areas may, depending on the outcomes of a specific flood risk assessment, be required to contribute to funding for the delivery of appropriate flood alleviation schemes.	To recognise Critical Drainage Areas
Policy PL10 New para after 32 (c) [then re-letter subsequent points]	Environment Agency	2 (d) proposed development in Flood Zone 3b must be 'water compatible' or 'essential' development	To clarify the only types of development allowed in this Flood Zone area
Policy PL10 Page 114-115	Environment Agency / Thames Water	43 Waste Water and Sustainable Drainage Systems (SuDS) Development proposals should identify how there is sufficient surface water, foul drainage and treatment capacity which can serve the development. Surface and foul water systems must be separate.	To strengthen the policy by including foul water requirements
		The use of SuDS in all development proposals, including the retrofitting of SuDS, is encouraged and will be supported. Where SuDS are required, the drainage scheme must meet the following criteria:	To include retrofitting of SuDS
Policy PL10 Page 114-115	Essex County Council	43 (c) achieve-greenfield runoff rates in line with the guidance of the non-statutory technical standards for sustainable drainage;	To ensure runoff rates adhere to the relevant guidance
Para 13.57 Page 116 (PL10 Justification)	Environment Agency	This policy will ensure that the quality of drinking water is maintained, avoiding harmful polluting developments which affect its quality. The requirement for development adjacent to designated main rivers to provide an undeveloped buffer zone will ensure the enhancement and protection of local biodiversity, provide space for flood water and provide access for maintenance. The necessity for a scheme to protect and enhance the conservation value of a watercourse, and to aim to improve water quality, is required by the Water Framework Directive and/or the Thames River Basin Management Plan.	To ensure water quality improvement and increased protection for biodiversity
First new para after existing para 13.61, page 116 (PL10 Justification)	Essex County Council	A number of Critical Drainage Areas have been identified based on the results of the Harlow Surface Water Management Plan. The risk of surface water flooding in these areas needs to be reduced and drainage improved.	To recognise Critical Drainage Areas

Second new para after existing para 13.61, page 116 (PL10 Justification)	Environment Agency	The requirement that any proposed development in Flood Zone 3b must be 'water compatible' or 'essential' development is in accordance with national guidance and the Strategic Flood Risk Assessment.	To explain FZ 3b requirement
New para after existing para 13.63, page 116 (PL10 Implementation)	Environment Agency	The Water Cycle Study emphasises the importance of non- residential development meeting a level of BREEAM compliance regarding water efficiency. The meeting of BREEAM 'Excellent' rating for water efficiency in non- residential buildings is, therefore, supported.	To encourage non-residential buildings to be as water efficient as possible
Second new para after existing para 13.63, page 116 (PL10 Implementation)	Environment Agency	Harlow contains a significant number of older buildings which will not be as efficient with water use as modern buildings. Measures to retrofit such buildings to increase their energy efficiency are, therefore, encouraged.	To include retrofitting of buildings regarding improving water efficiency
Para 13.67 Page 117 (PL10 Implementation)	Environment Agency	• where possible, flood storage should be maximised through the use of Green Infrastructure and by providing level-for-level, volume-for-volume floodplain compensation for development within the 1-in-100-year (plus climate change) extent.	To strengthen policy regarding floodplain compensation
Para 13.68 Page 117 (PL10 Implementation)	Thames Water	In terms of surface water flooding, the general aim should be to discharge surface run off as high up the following hierarchy of drainage options as reasonably practicable: 1. into the ground (infiltration); 2. to a surface water body; 3. to a surface water sewer, highway drain, or another drainage system; 4. to a combined sewer. 1. store rainwater for later use; 2. use infiltration techniques, such as porous surfaces in nonclay areas; 3. attenuate rainwater in ponds or open water features for gradual release, including the use of SuDS; 4. attenuate rainwater by storing in tanks or sealed water features for gradual release, including the use of SuDS; 5. discharge rainwater direct to a watercourse; 6. discharge rainwater to a surface water sewer/drain; 7. discharge rainwater to the combined sewer.	To expand hierarchy to include other options
First new para after existing para 13.68,	Environment Agency	It is expected that space is created for flooding to occur by restoring the functional floodplain, wherever possible, through a	To ensure adherence with national guidance on restoration of floodplain

page 117 (PL10 Implementation)		reduction of development footprint within Flood Zone 3b.	
Second new para after existing para 13.68, page 117 (PL10 Implementation)	Environment Agency	Water-compatible development and essential development are referred to in this policy. As defined by national guidance, water-compatible development includes flood control infrastructure, sewage transmission and pumping stations, navigation facilities and water-based recreation (excluding sleeping accommodation). Essential development includes essential transport infrastructure which has to cross the area at risk, wind turbines and essential utility infrastructure, such as power stations, which requires the location for operational reasons.	To define the development referred to in part 3(b) of the policy
Para 13.72 Page 117 (PL10 Implementation)	Environment Agency	The Essex SuDS Design Guide provides guidance on local standards for water quality and water quantity from developments and guidance on SuDS design. Developers should also consider national guidance on natural flood management techniques and working with natural processes, which seek to protect, restore and emulate the natural functions of catchments, floodplains and rivers.	To ensure developers consider natural flood management techniques
First new para after existing para 13.72 Page 117 (PL10 Implementation)	Environment Agency	All proposed development must engage the actions and measures as specified by the Thames River Basin Management Plan, where feasibly possible and reasonable. Developers should liaise with the Environment Agency on such actions and measures.	To ensure the TRBMP is considered by developers and EA is consulted
Second new para after existing para 13.72 Page 117 (PL10 Implementation)	Environment Agency	Appropriate arrangements for foul water must be identified where the local public sewer network does not have adequate capacity. Developers must demonstrate how any upgrades of the existing sewerage network, to alleviate capacity issues, would be delivered in advance of the development. New development must connect to mains foul drainage, but a foul drainage assessment may be required if non-mains foul drainage is proposed.	To provide further details on the requirements for waste water
Policy PL11 Page 118	Essex County Council	(a) the impact of development on the character, appearance, setting, or any other aspect of the significance of the asset or its setting;	To ensure setting of asset sufficiently recognised
Policy PL11 Page 118	Essex County Council	(d) the extent to which the development would enhance, or better reveal, the significance of the heritage asset;	To ensure 'hidden' assets are sufficiently recognised
Policy PL11,	Essex County Council	Where the heritage asset is at risk and the development would	To clarify what needs to be

demonstrated that the development presents he asset's optimum viable use and is necessary to secure the future conservation of the asset and that any negative impacts are outweighed. Para 13.78 Page 119 (PL11 Implementation) Para 13.78 Page 119 (PL11 Implementation) Para 13.78 Page 119 (PL11 Implementation) Essex County Council Designated heritage assets ean include listed buildings, curlilages of listed buildings, conservation areas, archaeological remains, Scheduled Monuments and Registered Historic Pparks and Ggerdens. Such assets, except Historic England. Glossary			
Biodiversity Page 180	N/A	Biodiversity The whole variety of life encompassing all genetics, species and ecosystem variations, including plans plants and animals.	Туро
Community Infrastructure Levy (CIL) Page 181	N/A	Community Infrastructure Levy (CIL) A levy allowing local authorities to raise funds from owners or developers of land undertaking new building projects in their area. Learn more about the Community Infrastructure Levy.	Not required
Conservation Area Page 181	Historic England	Conservation Area An area of notable environmental or historical interest or importance which is administered by the Council as a Designated Heritage Asset and benefits from additional planning controls to protected by law it from against undesirable changes.	To clarify terminologies used
Flood Zone Page 182	N/A	Flood Zone Zone 1: Low probability: This zone comprises ILand assessed as having a less than 1 in 1000 annual probability of river or sea flooding in any year (<0.1%).	To ensure brevity

		Zone 2: Medium probability: This zone comprises ILand	
		assessed as having between a 1 in 100 and 1 in 1,000 annual	
		probability of river flooding (0.1% - 1%), or between 1 in 200	
		and 1 in 1,000 annual probability of sea flooding (0.1% – 0.5%)	
		in any year.	
		Zone 3a: High probability: This zone comprises IL and assessed	
		as having a greater than 1 in 100 annual probability of river	
		flooding (>1.0%), or a greater than 1 in 200 annual probability	
		of flooding from the sea (>0.5%) in any year. Developers and	
		local authorities should seek to reduce the overall level of	
		flood risk, relocating development sequentially to areas of lower	
		flood risk and attempting to restore the floodplain and make	
		open space available for flood storage.	
		Zone 3b: Functional Flood plain: This zone comprises ILand	
		where water has tomust flow or be stored in times of flood.	
		Local planning authorities should identify areas of functional	
		floodplain, in agreement with the Environment Agency, taking-	
		The	
		identification of functional floodplain should take account of	
Over Bull Barre 100	D1/0	local circumstances.	T NDDE
Green Belt Page 182	N/A	Green Belt	To ensure greater NPPF compliance
		An area of open land around an urban area, on which building	
		inappropriate development is restricted, primarily to prevent unrestricted sprawl and to provide the other nationally-set	
		purposes of Green Belt land.	
Green Finger	N/A	Green Finger	To add more information
Page 183		Linear, open and predominantly green spaces which link to	
		Green Wedges and primarily have a recreational/movement	
		function, as well as providing the other roles and functions as	
		detailed in the Local Plan.	
Green Wedge	N/A	Green Wedge	To clarify and add more information
Page 183		A series of open and predominantly green spaces, kept free	
		from inappropriate development, which run through the urban	
		area district and provide roles and functions as detailed in the	
		Local Plan, including allowing residents to easily access to	
11. 11. 1		important landscapes and the wider countryside.	
Heritage Asset	Historic England	Designated Heritage Asset	To clarify terminologies used
Page 183		Includes listed buildings and their curtilages, Conservation	

(to move directly after		Areas, Scheduled Monuments and Registered Historic Parks	
Conservation Area once		and Gardens. A building, monument, site, place, area or	
amended)		landscape identified as having Such assets have been judged	
amenaca)		to be of national importance in terms of architectural or historic	
		interest, therefore benefitting from additional planning controls.	
		a degree of significance meriting consideration in planning	
		decisions, because of its heritage interest. Heritage asset	
		includes designated heritage assets and assets identified by	
		the local planning authority (including local listing). They are	
		administered by Historic England, with the exception of	
		Conservation Areas which are administered by the Council.	
Green Infrastructure	Herts County Council	Green Infrastructure	To clarify and strengthen Green
Page 183	Tions County Countin	Refers to multi-functional green spaces that provide habitat,	Infrastructure definition
. ago . oo		flood protection, cleaner air, and cleaner water. Green	
		Infrastructure is multi-functional natural and man-made urban	
		and rural green space, including parks, playing fields,	
		woodlands, allotments and wildlife corridors, rivers, canals,	
		lakes and other water bodies. At a smaller-scale, it also	
		includes measures to assist climate change mitigation, such as	
		green roofs, and green walls, rain gardens and ponds.	
Locally Listed Building	Historic England	Locally Listed Building	To clarify terminologies used
(NEW entry, directly	3	Buildings which do not quite meet the criteria for being	
after <i>Infrastructure</i>		nationally listed by Historic England, but which are still of	
Delivery Plan) Page		architectural or historical importance in the local area. Such	
183		assets, which are non-designated heritage assets, have a	
		degree of significance meriting consideration in planning	
		decisions and are administered by the Council.	
Market Housing	N/A	Market Housing	To correct grammar
Page 185		Private sector housing, whose the prices of which are is set by	
-		the market.	
National Park Page	N/A	National Park	Not mentioned in Local Plan
185		The statutory purposes of national parks are to conserve and	
		enhance their natural beauty, wildlife and cultural heritage and	
		to promote opportunities for public understanding and	
		enjoyment of their special qualities. National parks are	
		designated by Natural England, subject to confirmation by the	
		Secretary of State under the National Parks and Access to the	
		Countryside Act 1949 (as amended).	

New Town Page 185	N/A	New Town They are designed by according to a master plan on a site where there was no settlement before	Туро
Non-Designated Heritage Asset (NEW entry, directly after <i>New Town</i>) Page 185	Historic England	Non-Designated Heritage Asset Includes Locally Listed Buildings, monuments, sites, places, areas or landscapes identified as having a degree of significance meriting consideration in planning decisions but which are not nationally designated heritage assets. Such assets are administered by the Council and may be on the Essex Historic Environment Record.	To clarify terminologies used
Registered Historic Park/Garden (NEW entry, directly after <i>Primary and</i> Secondary Frontages) Page 187	Historic England	Registered Historic Park/Garden Gardens, grounds, parks and other planned open spaces which are administered by Historic England and registered on the Register of Historic Parks and Gardens of special historic interest in England. They are designated heritage assets and benefit from the associated additional planning controls.	To clarify terminologies used
Scheduled Monument Page 187	Historic England	Scheduled Monument Nationally important monuments, usually archaeological remains that are afforded greater protection against inappropriate development through the Ancient Monuments and Archaeological Areas Act 1979 (as amended). Scheduled Monuments are designated heritage assets, administered by Historic England, and benefit from the associated additional planning controls.	To clarify terminologies used
Spatial Development Strategy (NEW entry, directly after Source Protection Zones (SPZ)) Page 187	N/A	Spatial Development Strategy Broadly sets out how the Vision for Harlow and the Themes and Strategic Objectives of the Local Plan will be achieved and delivered. The aims of the Strategy include protecting and enhancing important areas which offer residents a good quality of life, and changing areas through new development to improve living standards for existing and future residents. The Key Diagram graphically represents the Strategy.	To add information
Strategic Growth Strategy (NEW entry, directly after Strategic Flood Risk Assessment (SFRA)) Page 188	N/A	Strategic Growth Strategy Provides the Strategic Policies to deliver the Spatial Development Strategy.	To add information

Sustainable Drainage Systems (SuDS) Page 188	N/A	Sustainable Drainage Systems (SuDS) A sequence of management practices and control structures designed to drain surface water in a more sustainable fashion than some conventional techniques and to mimic natural drainage as closely as possible.	To add information
